

May 8, 2013

Schedule for the workshop with Dr. Lazaros Foukas, external advisor for the program:
“Common pathogenetic mechanisms and pathways of the matrix-related diseases of Diabetes and Alzheimer resulting in apoptotic cell death”
(Meeting in the small meeting room of IB-A)

- 10.00am: Arrival: Meeting with the group-coffee.
- 10.45-11.05am Short introduction to the project: **E. Tsilibary.**
- 11.05-11.45 am Brief review of data regarding insulin survival pathways in pancreatic insulin-producing β -cells: **P. Kitsiou.**
- 11.45-12.15 pm: On the role on nephrin in glomerular epithelial cells in the kidney: general & preliminary data: **G. Drossopoulou.**
- 12.15-12.45pm: Insulin survival pathways in glomerular epithelial cells – initial approaches: **E. Katsoulieris.**
- 12.45-14.00pm: **Dr Lazaros Foukas** & group members: *Discussion regarding insulin-survival pathways.*
- 14.00-15.00: Lunch at the cafeteria of NCSR Demokritos (catering).
- 15.00- 15.30: Brief review of MMP9 data in MMP9 and MMP9/5xFAD mice & Recent data regarding primary neuronal (hippocampal) cultures: **A. Kaminari.**
- 15.30-16.00: Brief overview of the role of ApoE4 fragments on MMP9 in brain cell lines: **A. Chroni.**
- 16.30-17.30pm: **Dr. Lazaros Foukas** & group members: *Discussion with problems, suggestions, new ideas etc., over coffee*

All presentations will be given in Greek.
